GET IN TOUCH

POWERING PROGRESS, DELIVERING TRUST

Founded in 1995, Famiar Generating Systems has grown into a trusted leader in power backup solutions across East and Central Africa.

With decades of experience, we specialize in delivering innovative, reliable, and fully customized systems designed to meet the unique needs of each client.

Our expertise spans the full power lifecycle, from design and installation to maintenance and technical support, ensuring uninterrupted power for critical operations across industries.

At Famiar, we're driven by a commitment to quality, performance, and long-term partnership.

OUR JOURNEY OF POWER, INNOVATION & GROWTH

VISION

To power Africa's future with reliable, sustainable energy solutions that inspire progress, resilience and lasting impact for every community and business

MISSION

To be a leading force in delivering exceptional backup power solutions enhancing customer experience, empowering people, supporting Africa's growth, and driving the transition to reliable, efficient energy.

OUR VALUES

POWERING **INTEGRITY**

POWERING **HONESTY**

POWERING **COMMITMENT**

POWERING **FLEXIBILITY**

OUR POWER SOLUTIONS

We offer a comprehensive range of products designed to ensure uninterrupted power and maximize efficiency.

DIESEL, GAS AND BIOGAS GENSETS

Our robust gensets (2.2kVA to 6500kVA) cater to small-scale and large-scale needs.

Natural gas and biogas gensets provide continuous power for off-grid or unreliable grid areas, with cogeneration options for enhanced efficiency.

PORTABLE GENSETS

Lightweight and mobile, our portable gensets are perfect for construction sites, rural Homes, and events, with optional automatic changeover panels for seamless power transitions.

NEW! SOLAR HYBRID POWER SYSTEM LOWER ENERGY COSTS, MAXIMIZE UPTIME

Take control of your energy bills while ensuring continuous power with our Solar Hybrid Systems:

Solar First Operation

Primary daytime power comes from solar panels. Reduces grid reliance and electricity bills, boosting sustainability.

Battery Storage Backup

Stores excess solar power for use at night. Lowers dependence on the grid and avoids peak charges.

Grid Back Up

The grid kicks in only when needed, i.e low solar/battery output or high demand
Ensures stability while minimizing carbon footprint.

Genset Stand By

Automatic genset supports the system during extended outages.
Ensures uninterrupted power, used when necessary

MOBILE LIGHTING TOWERS

Customizable lighting towers illuminate construction sites, roadworks, and outdoor events, ensuring safety and productivity.

BATTERY ENERGY STORAGE SYSTEMS

Our advanced storage systems offer versatile integration with solar and fossil fuel sources, fast response times, and cost efficient operation during peak demand.

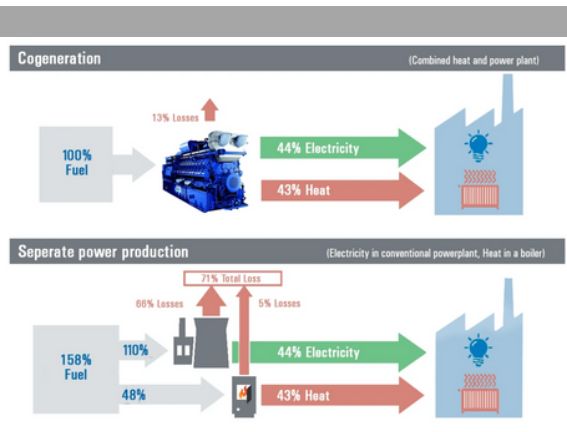

UNINTERRUPTIBLE POWER SUPPLIES (UPS) & INVERTERS

Ensure critical operations stay online with our reliable UPS and inverter systems, designed for efficiency and durability.

COGENERATION & TRIGENERATION

Generate electricity, heating, and cooling simultaneously ideal for industrial use with fast ROI (4–5 years), reduced energy costs, and improved sustainability.

SPARE PARTS

At Famiar, we maintain a centrally located and well stocked spare parts store that caters to a broad range of power system requirements.

Our inventory includes high quality components essential for engine care, electrical controls, power protection, and overall system reliability.

We supply parts not only for our own solutions but also for various leading brands in the power backup industry, ensuring compatibility, performance, and value.

With a strong focus on fast turnaround and operational efficiency, our spare parts are readily available for prompt delivery, minimizing downtime and keep your systems running

**POWERING PERFORMANCE
WITH EVERY PART**

TRAINING & SPECIAL PROJECTS

We offer technical training tailored to your team's skill level, whether beginner or advanced, and custom project design services for unique power requirements.

Our in house design team works with top-tier partners to execute complex projects with precision and industry best practices.

SPECIALIZED PROJECTS :

Cogeneration Systems: Utilize waste heat for energy efficiency, as implemented in Tanzania's safari lodges.

Automated Fuel Systems: Remote monitored systems for power plants in Kisumu, Kigali and Mogadishu

Super Silent Systems: Ultra quiet gensets for hotels and media sectors.

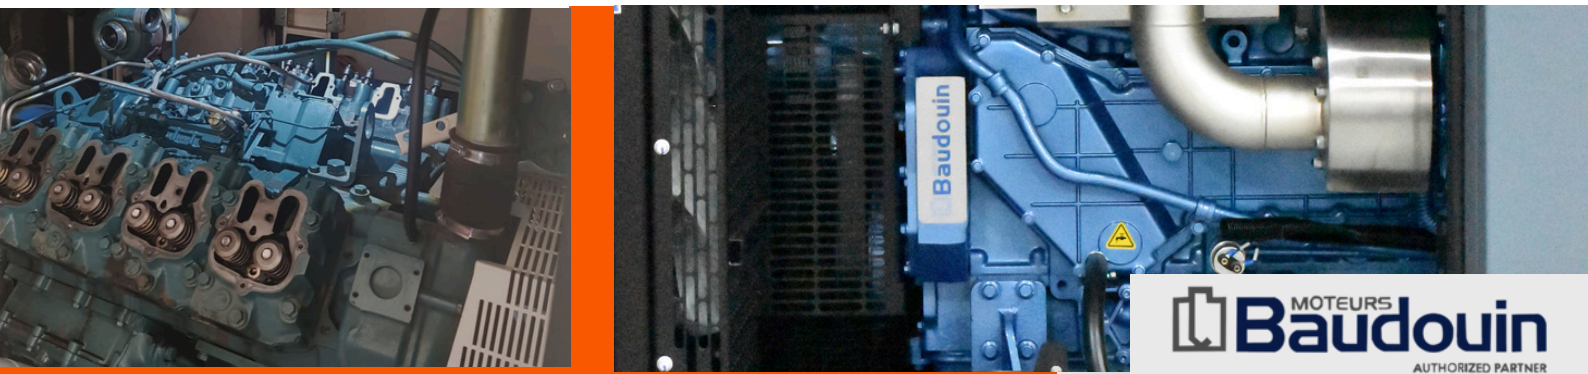

Solar Hybrid Integration: Optimized systems for telecommunications and construction.

Corrosion Resistant Canopies: Durable solutions for harsh environments.

SUPPORT THAT NEVER SWITCHES OFF

We prioritize long-term client relationships through exceptional service:

- **24/7 Technical Support:** Round the clock assistance to minimize downtime, servicing a wide range of genset brands
- **Genuine Spare Parts:** High quality components, enhanced genset performance.
- **Maintenance Contracts:** Tailored plans for preventive care.
- **Training Programs:** Beginner and advanced technical training for your team

Famiar is a certified Baudouin Service Center, delivering expert care for Baudouin engines and comprehensive aftersales services to clients across all sectors.

Brands we service and supply genuine parts for:

13 Perkins | Cummins | Mitsubishi Heavy Motors | Hyundai | Doosan | Lister Petter | SDEC

WHY CHOOSE FAMIAR

Backed by a wide distribution network and a strong commitment to excellence, FGS is recognized for delivering power solutions that are both dependable and responsive.

Our highly skilled technical team is dedicated to understanding each client's unique needs and exceeding expectations with every solution.

- **30+ Years of Expertise:** Delivering proven, reliable power solutions backed by decades of industry insight.
- **Cutting Edge Technology:** Leveraging the latest advancements for efficiency and reliability.
- **End to End Solutions:** From design and installation to 24/7 support and maintenance.
- **Strategic Partnerships:** Recognized Service Center for Baudouin Engines, offering specialized maintenance and technical support.
- **Regional Presence:** established footprint across East and Central Africa, ensuring timely support wherever our clients operate.
